DETAILED ACTION

Election/Restrictions

Claims 1-18 and 22-26 are generic to a plurality of disclosed patentably distinct species comprising an RAR antagonist or an RAR inverse agonist which is represented by compound of different formulae found in claims 6-18.

For example, if the compound is having formula in claim 6, and X is S, Y is phenyl, R₁₄ is phenyl, R₂ is CH₃, and R₃ is H, the compound is classified in class 514, subclass 432;

if X is O, Y is phenyl, R₁₄ is phenyl, R₂ is CH₃, and R₃ is H, the compound is classified in class 514, subclass 456;

if X is N, Y is phenyl, R₁₄ is phenyl, R₂ is CH₃, and R₃ is H, the compound is classified in class 514, subclass 311;

if the compound is having formula in claim 7, and X is S, Y is phenyl, A is CH₃, B is H, and p =1, the compound is classified in class 514, subclass 434;

if X is O, Y is phenyl, A is CH₃, B is H, and p =1, the compound is classified in class 514, subclass 452;

if X is N, Y is phenyl, A is CH₃, B is H, and p =1, the compound is classified in class 514, subclass 291;

Due to the structural dissimilarities of active an RAR antagonist or an RAR inverse agonist encompassed by the claims and their corresponding diversity in classification, the search for all species presents an undue burden on the office.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species of an RAR antagonist or an RAR inverse agonist, even though this requirement is traversed.

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

A telephone call was made to Mr. Greg Hollrigel on July 25, 2001 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
